1. The first step is to identify the problem. This involves understanding the symptoms and the context in which they are occurring.

[illegible]

1. The first step is to identify the main components of the system. This includes the hardware (CPU, memory, storage) and the software (operating system, applications).

2. Next, we need to understand the flow of data and control within the system. This involves analyzing the system architecture and the interactions between different components.

3. Once the components and flow are understood, we can begin to optimize the system. This may involve upgrading hardware, optimizing software, or reconfiguring the system.

4. Finally, we need to monitor the system to ensure it is performing optimally. This involves setting up performance metrics and regularly checking the system's status.

This actor's prime goal

How would you describe your best friend's best friend? In the case of actor James Franco, the answer is: "a guy who's taking his time to relax."

It's a bit of a cliché, but as a younger actor, Franco has been the "quiet" one in the room.

But a more recent Franco (Franco and his brother, Peter, are the stars of the new HBO comedy *Broken Flowers*) is a bit more of a "loud" one.

James Franco will admit that he's a bit of a "loud" one.

Warner sues CBS over 'Two and a Half Men'

IT'S OFFICIAL: WARNER BROS. HAS SUED CBS FOR INFRINGEMENT OF ITS PATENT ON THE "STUTTERING" VOICE EFFECT USED IN THE TV SERIES "TWO AND A HALF MEN."

The lawsuit alleges that CBS, which has 10 million viewers a week, copied the "stuttering" voice effect from Warner's "The Simpsons" and used it on "Two and a Half Men." The suit also claims that CBS is using the effect on other shows, including "The X-Files" and "The Practice."

Warner Bros. claims that the "stuttering" voice effect is a trademark of its company and that CBS is infringing on its rights. The suit seeks damages of \$10 million and an injunction against CBS from using the effect.
